

NEW BERRY HARVESTING SOLUTIONS

 **SOFTSurface**

Compatible with the Oxbo 7440, 8040, 8140 and 7450 the Oxbo SoftSurface kit has proven to reduce internal bruise damage in mechanically harvested blueberries.

Oxbo is proud to bring this new technology to market and is excited about the increases in marketable fruit we can help our customers deliver. But, every grower should think of this kit as part of a full system of interconnected decisions and activities where each one must be fine-tuned to deliver high quality blueberries.
