

Trash Return Chutes

Part Number for 6220s: RH Assy 162562, LH Assy 162560

Part Number for 6420s: 163010 (Qty 2)

Introduced with the new Oxbo 6230, these new trash return chutes better return grapes and clusters to the bucket conveyance system. The steeper angle allows matter carried over by the bucket line to return to the bottom of the harvester. The new design provides better product flow in both grapes and olives.

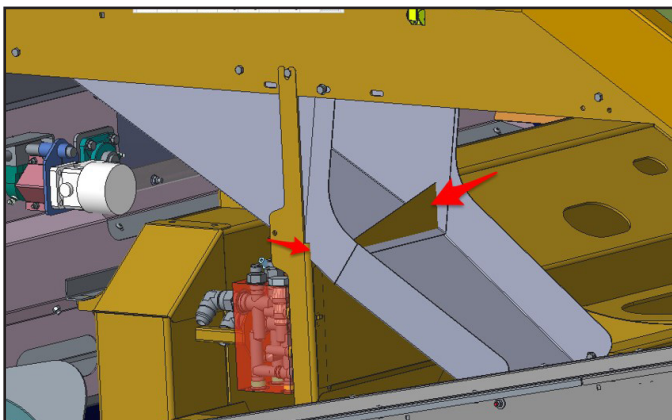

Existing Version

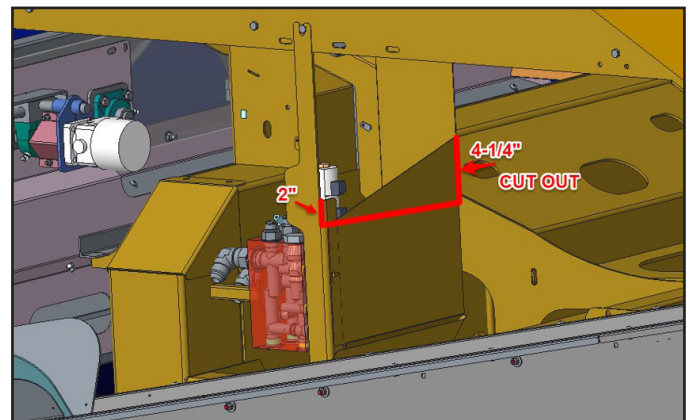

New Version

The left side can be installed as a direct replacement for the existing trash chute. The right side requires modification. The machine shielding must be trimmed to accommodate the new chute as illustrated in the following pictures:

Interference of right side trash chute with existing shielding.

The shielding must be modified for the right side chute to be installed.
