

SIMPLESort

After three years of working with mills and growers in the Olive industry to test and validate the design, Oxbo is pleased to introduce our on-board system to remove material other than olive (MOO).

The SIMPLESort MOO remover was intentionally designed to be a retro-fit option, by adding to the over-the-row conveyor (OTRC). The fruit stream travels through a series of star wheels, which removes the trash (sticks, twigs, etc.), while olives pass through onto the OTRC, and a trash belt drops the MOO onto the ground between rows. This efficient system allows for **cleaner loads at the mill and faster processing time.**

Available on new and existing 6420s and 6430s.

NEW

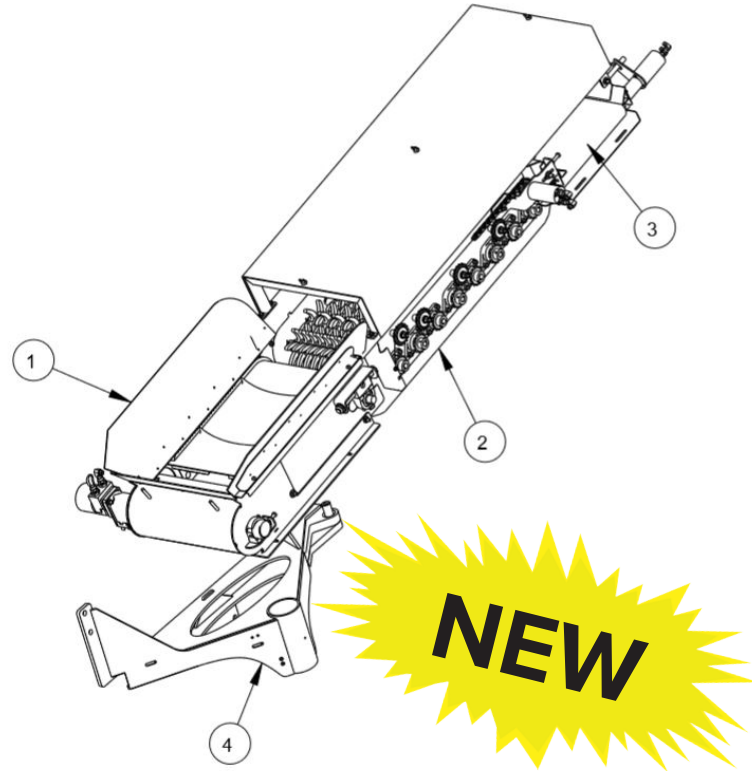

SIMPLESort MOO Remover

Kit Number: 164900

Kit Includes

Key	Part Number	Part
1	164901	Remoover Kicker ASM
