

# Replaceable Shaft Conveyor Rollers

for Oxbo DB-18, Super Jack and 24XX Series Harvesters

In a continued effort to maximize product performance, Oxbo is now offering replaceable shaft conveyor rollers for the Super Jack, DB-18, and 24xx series harvesters. The replaceable shaft rollers offer customers the ability to replace a worn shaft instead of replacing the complete roller. The replaceable shaft rollers can be installed on machines model year 2016 and older and will be included in the 2017 production of the 24xx series machines.
