

DynarotorPlus Picking System

Part Number: 164952

The DynarotorPlus was developed for customers with large blueberry bushes with heavy fruit. The DynarotorPlus gives you the ability to increase the stroke of the rods while decreasing the head speed, giving you more selectivity on first pick, especially in the center of large plants.

Available on:

- All new 7440s
- Upgrade for any standard Dynarotor head on 7420s and 7440s
