

Bin Carrier

WB1000

The bin carrier was designed for easy bin pickup with 16 roller forks including 14 chain-driven rubber rollers and two additional front idler rollers. Featuring joystick control, the bin carrier is easy to operate; buttons and switches are in easy reach.

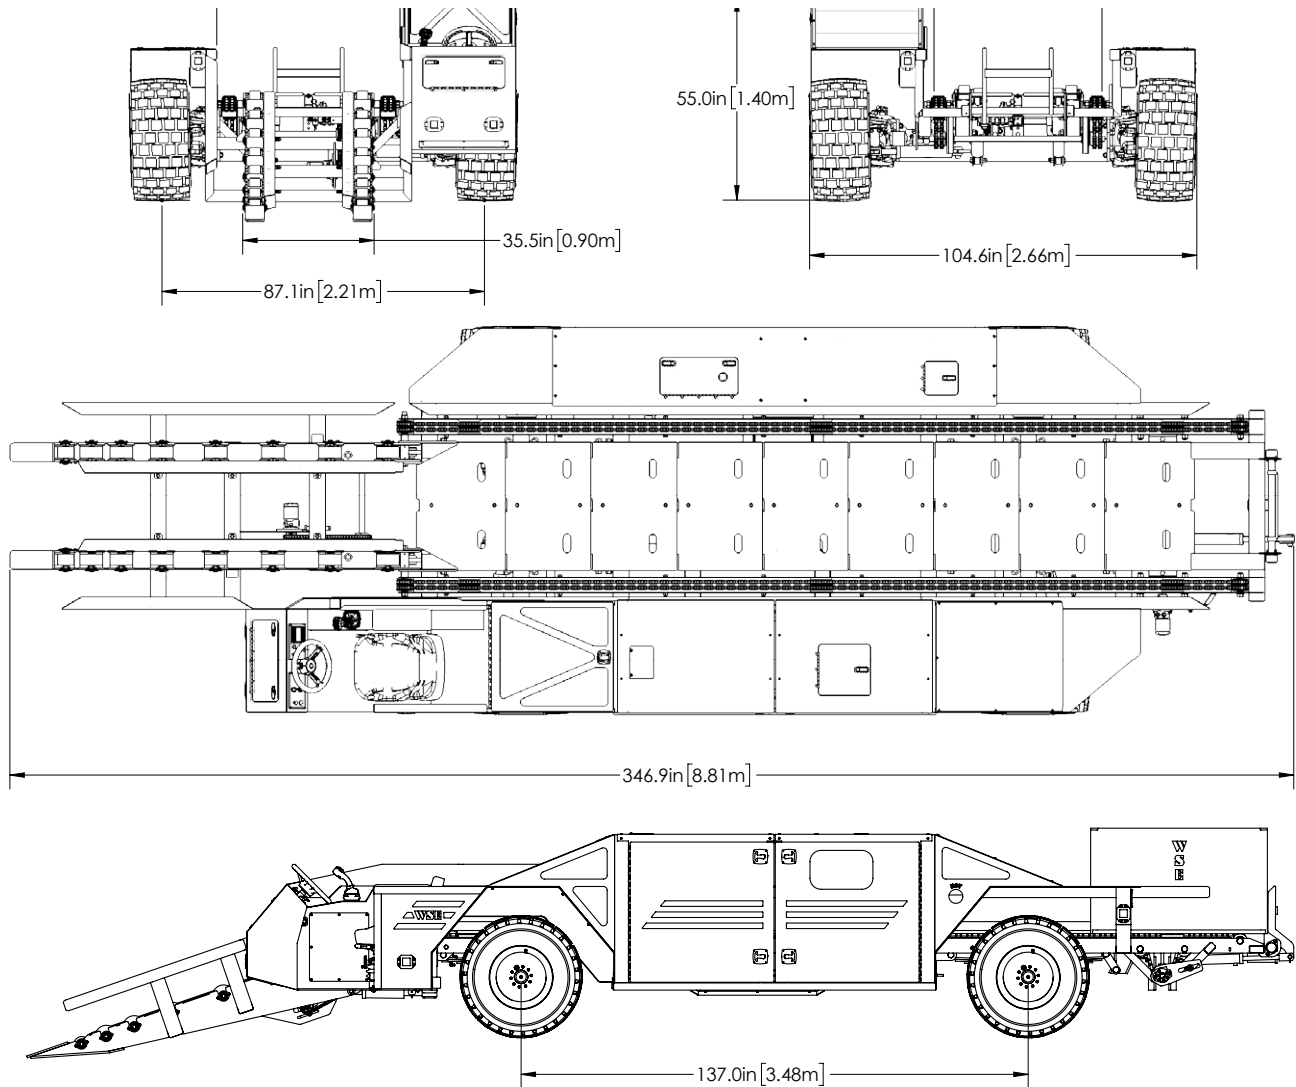

With a top speed of 22 MPH, the bin carrier is fast, efficient and durable.

A robust rigid frame design is supported by a heavy duty suspensions system. Suspension features six right and eight left leaf springs, coupled with heavy duty shocks to increase load capacity while maintaining smooth ride quality.

Add optional GPS tracking and aggressive tread directional.
