

GRAPE & RAISIN HARVESTER

3130

OXBO 3130

HARVESTING MADE SIMPLE. HARVESTING MADE BETTER.

Oxbo backs all of its harvesters with decades of experience building and supporting specialty harvesting solutions. With dealers and service providers around the globe, Oxbo stands behind its equipment with readily available parts and in-field service support.

The 3130 is unique and known for its three-wheel design that delivers the tightest turning radius of any harvester on the market, turning in 15-foot headlands. The 3130 is a dependable grape harvester, with an open-station operator platform, the industry's widest picking tunnel, an effective bow rod picking system, and a three fan cleaning system that delivers clean, high-quality fruit, even in heavy tonnages.

Built on the legacy of the 3000 series and the popular 3016XL, the 3130 is rugged, easy to operate, and easy to maintain.

The 3130 is a straightforward harvester designed simply to be reliable season after season. Low-cost, easy to source parts keeps total cost of ownership low.

Each area of the 3130 was designed to deliver the highest performance, from ECOMode to the ground drive.

Each functional area of the 3130 was designed to make routine maintenance simple and easy and to allow customers to keep their equipment up and running.

The 3130 can be configured to pick wine, juice, or raisin grapes on a variety of trellis systems.

✓ **VISIBILITY & CONTROL**

Oxbo harvesters have an industry reputation for being user friendly and easy to operate. The centered operator, compete light package, and optional camera system provide optimal visibility. The 3130 features integrated technology with simple icons, diagnostics in both English and Spanish. Durable controls and displays withstand the harsh vineyard environment year after year and deliver increased efficiency and less downtime.

✓ **CONVEYANCE & BUCKETS**

The 3130's conveyance options include a right over-the-row conveyor for grape harvesting or double right and left over the row conveyors for continuous tray raisin harvesting. Oxbo's 16-inch high conveyance buckets are designed to carry your fruit, not drag it. The durable buckets retain free run juice, capturing more of your harvest and maintaining fruit integrity.

SPECIFICATIONS

Standard Features	
Engine	Kohler 74 hp (55.2 kW) @ 2,600 rpm, Tier IV
Tires	
Front	360/70 R20
Rear	420/70 R28
Dimesions	
Width Single OTRC	10 ft. 9 in. (3.26m)
Width Dual OTRC	11 ft. 3 in. (3.43m)
Length	17 ft. 4 in. (5.28 m)
Shipping Height	12 ft. 0 in. (3.66 m)
Min. Field Height	12 ft. 6 in. (3.81 m)
Max. Working Height	14 ft. 5 in. (4.42 m)
Lift	24 in. (61 m)
Catcher Length	9 ft. 4 in. (2.84 m)
Tunnel Width	2 ft. 8 in. (0.81 m)
Min. Tunnel Height	6 ft. 6 in. (1.98 m)
