

Oxbo Molded-to-Width Lower Belts

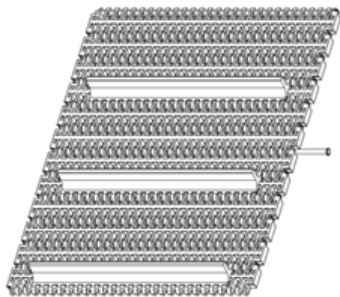

Oxbo now offers replacement lower conveyance belting for our berry harvester product lines in one-foot sections. Replacement belting has always been available for purchase in various forms, from a complete machine belting to the lower belting one side, and also as individual pieces. Offering these belts for purchase by the foot provides greater flexibility when it comes to replacing wear items, by removing the need to purchase more than is required and reducing the labor involved in assembling individual belting sections.

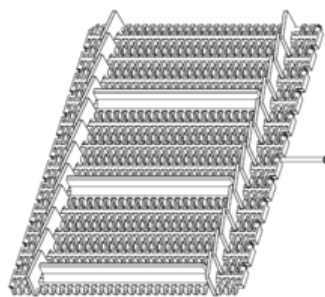

See chart below for the correct part number for your machine.
