

6030 HARVESTER SUPPORT CATCHERS UPGRADE KIT

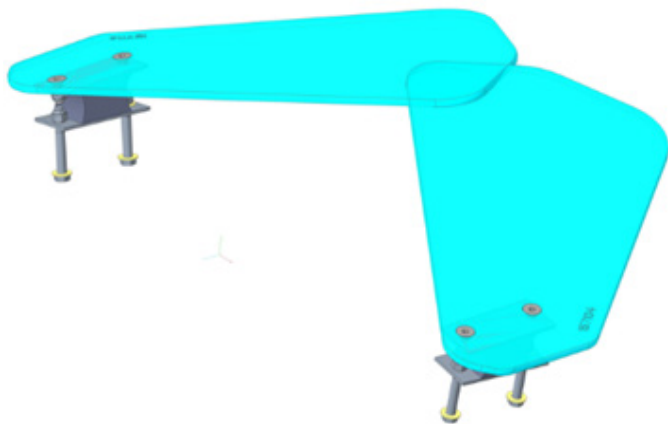

The large size of the rear most catcher plates may result in sagging overtime in heavy crop conditions. To prevent these catcher plates from sagging Oxbo offers an upgrade kit to add 2 additional support catchers just below the rear most catchers. With their smaller size they are able to be bolted to the existing catcher rail below and behind the Right and Left Rear Catcher plate assemblies. This upgrade will prevent unwanted sagging and help reduce unwanted fruit loss.

See chart below for the correct part number and fitment for your machine.

PC0004270 6030 Harvester Support Catchers Upgrade Kit must be installed with 167210 Torsion Block Catchers Option.
