

Bucket Chain Guide Enhancement

Oxbo has improved the design of the bucket chain tracks on all top loader berry harvesters in 2025.

Replacing the metal chain tracks with plastic chain guides allows for smoother, quieter operation and reduced wear to the chains and bucket pins. The Bucket chain guides ensure this smooth operation by guiding the chains through the transition between the lower belts and top deck.

For use with all 2010-2024 7420, 7440 and 7450 harvesters, or any top loader equipped with Roller Chain style Bucket Assemblies.

Part Number	Description	Quantity	Model Number
PC0003676	BUCKET GUIDE	4	7420 / 7440 / 7450

Utilize the existing mount holes and hardware for easy retrofit installation.
